QUIZ!

Quiz Stuff

Use a full sheet of 8½x11" paper. (Half sheet? Half credit!)

To avoid a one-point deduction, put your last name and NetID in the far upper left hand corner of the paper, **where a staple would hit it.** (It helps with our paper handling!) Like this:

Mitchell, whm

· ·

No need to write out questions. Number responses if you'd like, but that's not required. Keep answers short to save time.

There are six ½-point questions. The seventh question is worth one point.

You'll have 3 minutes on this quiz.

Quiz 10, November 4, 2013
3 minutes; 4 points

1. Write an example of a URL with two URL parameters. Use the host **x.com**. Keep it short!

2. Write a PHP statement to assign the value of the URL parameter **"n"** to a variable named **$n**.

3. HTML **<input>** elements are usually contained in a _____ element.

4. If you type **google.com** in your browser's address bar and hit ENTER, the browser does an HTTP _____ request.

5. What type of user interface control is created by **<input type=submit ...>**?

6. What type of user interface control is created by **<input type=hidden ...>**?

7. Write one or more PHP statements to create an array that contains an array. (1 point)
