

Sew'ing-ma-chine' Gage. A device for directing the goods to the needle, parallel with the edge of a selvage or edge, or with a previous hem, etc.

a is an edge-gage attached to the presser-foot and adjustable laterally.

b is attached to the cloth-plate in advance of the needle-hole.

c is a device to enter a seam to insure the parallelism of a second seam.

Fig. 4882.

Sewing-Machine Gages.
