VOL XXX NO 11  
NOVEMBER 1953

Here are 2 samples of the useful 2-harness Log Cabin weave. The main sample is the fabric suggested for Pot Holders. Warp is Lily Article 714, Black-K-2 used double, and Article 514, Wine-1322. Weft reverses these colors: Article 514, Black-841, and Article 714, Wine-K-108 used double. Carpet warp may be used instead of the double strand of Article 714. The tiny sample is given for comparison. It shows the Log Cabin weave when identical material in two colors is used for warp and weft -- in this case, 18/2 worsted at 24 ends per in.
