Summer Undergraduate Research Internships Available from AccessComputing

For the fifth year in a row, the NSF-funded AccessComputing Alliance is pleased to announce the availability of funds to support undergraduate research students with disabilities during the summer. Please let your undergraduate students know about these opportunities and have them fill out the application form at the website:

https://catalyst.uw.edu/webq/survey/blaser/259447

Students interested in an internship should also apply to be an AccessComputing team member by filling out the application at:

If you know of a faculty member who is interested in having a student with a disability as a summer research intern, please have them fill out the application form at the website:

https://catalyst.uw.edu/webq/survey/blaser/259448

To enhance the research experience we are working in cooperation with the CRA-W DREU program where students and mentors will join that program to help enrich the research experience.

In either case, the application should be submitted before March 8, 2015.

If you have any questions please contact me or Brianna Blaser, blaser@uw.edu.

Thanks,

Richard E. Ladner
Professor in Computer Science and Engineering
University of Washington
