Junior Programmer Trainee (ServiceNow Center of Excellence) Cognizant Technology Solutions

Description

Leveraging Cloud technologies not only improves operational efficiencies but can potentially transform entire business models. ServiceNow is a cloud based product that is transforming IT Service Management for both big and small enterprises with simplicity and innovation. With Cognizant’s Cloud-enabled enterprise transformation fabric, we partner with enterprises in their journey from vision to execution; and help transform their IT Service Management processes, applications and entire datacenters through our comprehensive range of services built on ServiceNow platform.

We are looking for graduates coming out of colleges who would be interested to learn the following:

- ITIL V3 and ServiceNow.com experience, and able to think through solutions of concepts
  Ability to map out to ITIL process flows (Incident, Problem, Change, Asset, Configuration, Knowledge) and associated models into ServiceNow
- ServiceNow Implementation specialist and Admin certification

Location – Phoenix, AZ

Qualifications

- Bachelor’s Degree (preferably in MIS, Computer Science, or related)
- Must have taken software engineering, data structure, algorithm, database concept courses in bachelor degree curriculum.

ADDITIONAL SKILLS & REQUIREMENTS:
- Must be a self-starter who requires minimal supervision.
- Experienced in problem solving and able to follow a methodical implementation process.
- Excellent interpersonal and organizational skills and ability to handle diverse situations, multiple projects and rapidly changing priorities
