New in Fall 2015

STEM Outreach & Student Engagement Program

Earn academic credit while helping local K-12 schools implement innovative, hands-on STEM programs!

Through the new STEM Outreach and Student Engagement Program (STEM-OSEP) you’ll attend weekly classes where you’ll learn about issues of diversity and social justice in STEM fields and gain concrete skills in how to implement STEM educational programs. Then, you’ll be placed with local school programs to put this knowledge into action, working with teachers and school staff to develop and implement programs that get K-12 students excited about science, technology, engineering, and math!

From helping to run after school science clubs to implementing schoolyard biodiversity inventories to building solar ovens with middle school students, you’ll have the chance to build-on what you learn in your UA classes to get others excited about STEM!
