START-UP help needed

Tucson based start-up in the initial formative stage is looking for a computer science undergraduate or graduate student to who will become a partner with the founder and help with the creation of a product and business.

A current UA graduate student in the AREC program is looking for a partner or help creating a product and a business.

The interested applicants should have strong background in programming, and an understanding of cloud computing with Bluetooth connectivity. Applicants need to be dedicated and focused.

Preferred qualification: a graduate student in computer science, but interested undergraduates with a solid understanding of the required items identified above are encouraged to apply.

Options for payment include a partnership or equity in the product and company being developed. If that is not acceptable to the desired candidate, a pay rate can be discussed.

If you know what a POS system is, that is a good start.

Interested applicants should submit a resumé to:

Gouro Camara at:

gcamara@email.arizona.edu

In the email please provide a brief introduction of yourself, your programming background and your expectations of this opportunity.

Thank you.
