Software Engineer Intern
Ubiquia, Inc.
Phoenix, Arizona

Work Smart, Play Hard, at Ubiquia

ubiquitous | Adjective | yoo • bik • wi • tuhs

synonym: omnipresent

School is out for the summer. Are you ready to launch your career learning from the best in a relaxed collaborative environment? For one lucky intern, Ubiquia will provide that experience, and it will make this summer one not to forget. Oh, and you will get paid to do it.

Who is Ubiquia?

Ubiquia (yoo • bik • we • ah) propeller heads engineer web-based and mobile applications from the beautiful deserts of Arizona. Based in offices in Phoenix, we challenge each other each day to deliver leading edge technology in an easy to use format. Our offices are architecturally unique, and our work environment lends itself to creativity so that our employees enjoy building applications for our customers. We invite you to learn more about our company and our company culture at www.ubiquia.com/about/our-culture/.

Responsibilities:

- Daily interaction with the Software Engineering team in agile scrum environment;
- Undertaking of software engineering tasks under the guidance and supervision of the Software Engineering Team;
- Testing and code review; and
- Development and implementation of an “I.P.P.” (Intern Product Project) that will be produced with the assistance of the Ubiquia propeller heads. Come with big ideas to change how the world works.

Are you the one for us?

You will be a perfect candidate if you have the following skills attributes:

- You’re currently enrolled fulltime and pursuing a degree in Computer Science, Engineering, or related field;
- Experience in one or more of the following: PHP, C#, CSS, SQL, IOS, and Android;
- You thrive in fast-paced environments, are flexible and able to roll with changing scenarios;
- You’re a problem solver: make things happen & work well with others to build constructive & effective relationships;
- You seek initiative: volunteer readily; undertake self-development activities; seek increased responsibilities; takes independent actions and calculated risks;
• You’re detail-oriented, someone who rolls up their sleeves and gets the job done;
• A passion for innovation;
• A love for: guitars, motorcycles, running, coffee, Magic the Gathering, or grilling (extra points for family secret BBQ sauce recipe).

**What we offer:**

• A fun work environment where you can grow.
• Weekly collaboration day with the team in order to refresh (lunch included).
• Work directly under an experienced software engineering team to grow your skills.
• Possibility for full time employment after obtaining your bachelor’s degree.
• Flexible start and end dates to coincide with your summer break.
