CSc 466/566 Computer Security

Assignment 1

Due March, 2012
Worth 5% (ugrads), 5% (grads)

Christian Collberg
Department of Computer Science, University of Arizona

Introduction

In this exercise you will learn how to pick locks!

Procedure

1. Check out one of the lock-picking sets from the 9th floor academic office.

2. Practice until you can pick as many of the locks marked 1-5 as possible.

3. *You cannot use the rake, only a regular pick and the tension wrench!*

4. *You cannot do lock bumping!*

Assessment

1. Sign up with the TA for an assessment. You will get 15 minutes to try to open as many of the locks as you can.

2. You will get 20 points per opened lock, for a total of 100 points.
