

David K. Lowenthal

Department of Computer Science
The University of Arizona
Tucson, AZ 85721

dkl@cs.arizona.edu
<http://www.cs.arizona.edu/~dkl>
(520) 626 8282 tel
(520) 626 5997 fax

Education

Ph.D. in Computer Science, The University of Arizona, May 1996.

Thesis advisor: Greg Andrews.

Dissertation: *Fine-Grain Parallelism and Run-Time Decision Making*.

M.S. in Computer Science, The University of Arizona, May 1992.

B.S. in Computer Science, The University of California, Davis, June 1990.

Research and Teaching Interests

Parallel and distributed computing, power-aware computing, operating systems, compilers, networking.

Professional Experience

Professor, The University of Arizona, Department of Computer Science, January 2009 to present.

Professor, The University of Georgia, Department of Computer Science, August 2007 to December 2008.

Associate Professor, The University of Georgia, Department of Computer Science, August 2002 to present.

Research Fellow, Princeton University, Department of Computer Science, September 2004 to January 2005.

Assistant Professor, The University of Georgia, Department of Computer Science, September 1996 to July 2002.

Research Assistant, The University of Arizona, Department of Computer Science, August 1992 to May 1996.

Submitted Journal Papers

1. Greg Striemer, Ali Akoglu, and David K. Lowenthal. Performance Modeling Tool for Compute Unified Device Architecture Graphics Cards. Submitted to *Journal of Supercomputing*, September 2010.
2. Min Yeol Lim, Vincent W. Freeh, and David K. Lowenthal. Adaptive, Transparent CPU Scaling Algorithms Leveraging MPI Communication Regions. Submitted to *Parallel Computing*, July 2010.

Submitted/In preparation Conference Papers

1. Jianxia Chen, Lakshmi Ramaswamy, and David K. Lowenthal. Finding Minimum Cost in Delay-Tolerant Networks.
2. Barry Rountree, David K. Lowenthal, Bronis R. De Supinski, and Martin Schulz. Performance Prediction Under DVFS.

Technical Reports/Manuscripts

John Hatcher and David K. Lowenthal. *monpp*: Monitors in Nachos. Technical Report 99-07, The University of Georgia, August 1999.

David K. Lowenthal and Vincent W. Freeh. Filaments Programmers Manual. Technical Report 98-03, The University of Georgia, June 1998.

Software

David K. Lowenthal and Vincent W. Freeh. *The Filaments Package for Implementing Efficient, Fine-Grain, Shared-Memory Parallel Programs*.

Grants

National Science Foundation iPlant Collaborative, “GPU Support for Generalized Linear Modeling”, January 2010–January 2011, \$80,000.

National Science Foundation Computer Systems Research Program (CSR), “MPI-PPA: Improving Efficiency of Large-Scale Clusters Through Statistical Performance Prediction” (PI; co-PI Jaxk Reeves, UGA Statistics), September 2008–August 2011, \$320,000.

National Science Foundation Computing Processes and Artifacts (CPA), “Detecting and Alleviating Sources of Scalability Problems” (collaborative proposal with Frank Mueller, NC State), September 2004–August 2007, \$160,000.

National Science Foundation Advanced Computational Research Program (ACR), “HC-MPI: A System for Out-of-Core, Heterogeneous Data Distributions”, Computer and Communications Research Grant, July 2003—June 2005, \$150,000 (additionally, \$12,000 on REU supplements).

State of Georgia *Yamacraw* Research Program, “An Integrated, Scalable Client-Server System for Energy-Aware Computing” (PI with Surendar Chandra; co-PIs: Ben Bishop, Scott Watterson, Suchendra Bhandarkar), October 2000–August 2004, \$472,000.

National Science Foundation Information Technology Research Program, “ITR/ACS: Stochastic Summation of High-Order Feynman Graph Expansions” (co-PI; PI: Bernd Schuttler, Dept. of Physics and Astronomy), September 2000–August 2003, \$487,000

National Science Foundation Research Instrumentation Grant, “Instrumentation Grant for Research in Parallel and Distributed Computing”, (PI; co-PIs: Eileen Kraemer and Suchendra Bhandarkar), Experimental and Integrative Activities, March 2000–February 2003, \$114,000 (includes matching from the University of Georgia Research Foundation).

National Science Foundation CAREER Award, “An Integrated Compiler/Run-Time System for Global Data Distribution”, Computer and Communications Research Grant, July 1998–June 2002, \$200,000 (additionally, \$7,500 on REU supplements).

National Science Foundation Research Instrumentation Grant, “Acquisition of a Symmetric Multiprocessor Scientific Computer System”, (co-PI; PI: David Landau, Dept. of Physics and Astronomy) September 1997–August 1999, \$420,000.

UGA Faculty Research Grant, “Improving Server Performance for the World-Wide Web”, University of Georgia Research Foundation, January 1997–December 1997, \$4,770.

Courses Taught

Parallel and distributed computing

Graduate introductory programming

Graduate operating systems

Undergraduate/Graduate [co-convened] operating systems

C++ and Systems Programming

Program Design and Development

Selected Professional Activities

Area Chair, Performance, SC '12; Area Co-Chair, Performance and Modeling, ICPP 2011

General Chair, International Conference on Supercomputing, 2011

Program Co-Chair, IEEE International Conference on Green Computing, 2010

National Science Foundation Grant Review Panel Member, 1999, 2002, 2003, 2004.

Co-Chair, Workshop on High-Performance, Power-Aware Computing (2005, 2006).

Tutorial and Workshops Chair, PPOPP 2008

Program Committee Member, PACT (2009), ICPP (2007, 2008), PPOPP (2007), SC (2006, 2009, 2011), IPDPS (2006, 2011), HiPC (2004, 2005), HIPS (2002, 2003, 2005), CLADE (2005, 2006, 2007), WNDA (2004), LCR (2002), RTSPP (1998, 1999)

Referee for *Network Systems Design and Implementation (NSDI)*, *Journal of Parallel and Distributed Computing (JPDC)*, *Architectural Support for Programming Languages and Operating Systems (ASPLOS)*, *Transactions on Computer Systems (TOCS)*, *Symposium on Operating Systems Principles (SOSP)*, *Operating Systems Design and Implementation (OSDI)*, *Transactions on Parallel and Distributed Systems (TPDS)*, *Principles and Practice of Parallel Programming (PPOPP)*, *International Conference on Supercomputing (ICS)*.

Member of the ACM, SIGPLAN, and SIGOPS.

Students

Name	Degree	Status	Title or Topic	Position
Aniruddha Marathe	Ph.D	3rd year	Cloud computing	—
Tapasya Patki	Ph.D	2nd year	Energy-aware supercomputing	—
Peter Bailey	Ph.D	2nd year	Energy-aware supercomputing	—
Brad Barnes	Ph.D	Aug 2011	Performance Prediction	Asst. Prof Muskingum Univ.
Barry Rountree	Ph.D	May 2010	Energy-aware supercomputing	LLNL
Mario Nakazawa	Ph.D	May 2005	I/O Considerations in Efficient Heterogeneous Data Distributions	Asst. Prof. Berea College
Haijin Yan	Ph.D	May 2005	Network Support for Energy Efficient, Wireless Communication	Motorola
Matt Cleveland	M.S.	2nd year	LSST	—
Michael Moore	M.S.	August 2006	Exo-TCP	Omaha M.U.D.
Rob Springer	M.S.	Aug. 2005	Minimizing Exec. Time in MPI Progs. on an Energy-Constrained, Power-Scalable Cluster	Phillips Electronics
Wenduo Zhou	M.S.	Dec. 2004	A Parallel, Out-of-Core Algorithm for RNA Secondary Structure Prediction	Postdoc Mich. St. Physics

Rupa Krishnan	M.S.	Aug. 2004	A Model of TCP over IEEE 802.11b Power-Save Mode	Ph.D student Stonybrook CS
Ed Cashin	M.S.	Aug. 2004	Automated Control of Hardware and Software Fault Isolation	BORF Research
Chris Bentley	M.S.	May 2003	OS Support for Low Cost Array Bounds Checking on 64-bit Architectures	Access Communications
Michael Gundlach	M.S.	Dec. 2002	A Power-Aware Scheduler for Streaming Multimedia Clients	Google
Brent Weatherly	M.S.	July 2002	A-MPI: Supporting MPI on a Nondedicated Assignments in Task/Data Parallel Programs	Res. Scientist UGA
Greg Price	M.S.	Nov. 2000	A Comparative Analysis of Fine-Grain Threads Packages	Clarke County
Don Morris	M.S.	Aug. 2000	Accurate Data Redistribution Cost Estimation in DSM Systems	HP
Bala Narasimhan	M.S.	June 2000	Twaritha: A Fast, User-Level Simulator for Virtual Memory Systems	Veritas
Ragavan Subramanian	M.S.	Aug. 1999	HyFi: Architecture-Independent Parallelism on a Network of Multiprocessors	Yahoo
Kar Balasubramanian	M.S.	Aug. 1999	Efficient Support for Pipelining in Distributed-Shared Memory Systems	NexGenix
Greg Howard	M.S.	Aug. 1998	An Integrated Compiler/RTS for Global Data Distribution in DSM Systems	SGI
Michael James	M.S.	Mar. 1998	Run-Time Selection of Block Size in Pipelined Parallel Programs	General Electric
Doug McCreary	B.S.	Aug. 2004	Low-latency TCP for multimedia	Guidewire Software
David Mayo	B.S.	Aug. 2004	Energy-aware video sensing	Motorola
Sarah Doster	B.S.	Aug. 2003	Streaming multimedia for mobile clients	Industry Arizona CS
Graham Greene	B.S.	Unknown	Efficient fine-grain parallelism	Radiant Systems
