

**THE PLOUGH, THE LOOM, AND THE ANVIL.** J. S. Skinner, 79 Walnut-street, Philad'a.

This well-known work well sustains its interest in the hands of Col. Skinner. Its usefulness is, however, greatly marred through the ultra-protective theories promulgated by such imaginative speculators as Mr. Carey. The absurd folly of taxing producers of the national wealth, in order to bribe others to leave profitable for unprofitable employments, should not, in so otherwise respectable and useful a work, be addressed to the clear understandings of American farmers.
